EDUCATION

University of Toronto	Toronto, ON
HBSc in Quantitative Biology, Genome Biology and Applied Data Science (ASIP Co-op stream)	09/2024 - 06/2028
University of California, Berkeley	Berkeley, CA
Berkeley Global Access (BGA)	09/2023 - 06/2024

PROFESSIONAL EXPERIENCE

Zhongyuan Petroleum Products Co., Ltd.	Guangdong, China
Development & Executive Associate (Internship)	06/2024 - 09/2024
○ Analyzed multi-source sales and customer datasets to support operational strategy decisions ○ Developed automated reporting workflows using Excel, SQL, and Power BI, improving efficiency of recurring analyses ○ Prepared visualizations and performance summaries for management reviews and executive decision-making	
Akeso Biopharma Inc.	Guangzhou, China
Clinical Data Science Intern	05/2026 - 08/2026
○ Applied Kaplan–Meier estimation, Cox proportional hazards models, and proportional hazards diagnostics to oncology trial case studies using R and SAS ○ Developed reproducible R and SAS workflows for clinical data exploration, survival endpoint analysis, and generation of statistical outputs ○ Evaluated oncology efficacy endpoints (OS, PFS, ORR, DOR) and compared their clinical and regulatory implications across different trial settings ○ Reviewed FDA guidance documents on overall survival interpretation, endpoint selection, and statistical considerations in late-stage oncology trials ○ Assisted in the preparation of analytical outputs and formatted summary tables for internal training exercises and exploratory analyses. Explored treatment-effect estimation under non-proportional hazards scenarios using RMST and MaxCombo methodologies ○ Developed familiarity with clinical research workflows, statistical programming practices, and data interpretation standards used in biopharmaceutical environments	

LEADERSHIP EXPERIENCE

- Teaching Assistant (Tennis), Youth Programs — Supported instruction, progress assessment, and communication with children aged 5-10 and parents in a collaborative team-based learning environment
- Community Support Volunteer — Provided logistical assistance and translation services to support local residents during the pandemic

SKILLS

- **Analytical & Quantitative Skills:** Survival Analysis (Kaplan–Meier, Log-rank Test, Cox PH, RMST), Hypothesis Testing, Regression Modeling, Data interpretation
- **Biological & Research Knowledge:** Foundations in genetics, molecular biology, and population biology
- **Data & Tools:** Python (pandas, numpy), R (survival, survminer, ggplot2), SAS (PROC LIFETEST, PROC PHREG), SQL, Excel
- **Languages:** English (Fluent), Mandarin Chinese (Fluent), Cantonese (Fluent)
- **Communication:** Scientific writing, data storytelling, cross-functional collaboration
